

Jintao

The world's
number 1
yellow kiwi

Genetic Origin

Natural selection of *Actinidia Chinensis*.

Characteristics of plant

- ✓ Winter chilling: medium, less than Hayward.
- ✓ Vigour: less than Hayward, short internodes.
- ✓ Bud break: 80-90% of bud break a few days earlier than Hayward.
- ✓ Flowering time: 1 week earlier than Hayward.
- ✓ Crop load: medium-high.
- ✓ Harvest time: two weeks before Hayward.

Characteristics of fruit

- ✓ Pulp colour: yellow.
- ✓ Appearance: regular cylindrical shape, smooth skin with a hazelnut colour. No double fruits, duplication or crushed fruit.
- ✓ Size: medium (approx. 80 to 130 g).
- ✓ Organoleptic characteristics: high sugar content, balanced acidity (25% less than green), a sweet and aromatic flavour.
- ✓ Nutraceutical properties: high content of vitamin C (145% higher than green kiwi on average), polyphenols (80% higher) and potassium.
- ✓ Storage shelf life: over 6 months in the refrigerator, thanks to the remarkable consistency of the skin.
