

Jinyan

The yellow
kiwifruit
designed for
overseas markets

Genetic Origin

Cross between *Actinidia eriantha chinensis* and *A. Chinensis*.

Characteristics of plant

- ✓ Winter chilling: low, less than Jintao.
- ✓ Vigour: high, 5-10 cm internodes.
- ✓ Bud break: about a week earlier than Hayward.
- ✓ Flowering time: about 10 days earlier than Hayward.
- ✓ Croap load: very high
- ✓ Harvest time: similar to Hayward.

Characteristics of fruit

- ✓ Pulp colour: bright yellow.
- ✓ Appearance: cylindrical shape, smooth skin.
- ✓ Size: medium-large (larger than Hayward).
- ✓ Organoleptic characteristics: tender, juicy flesh with a sweet, aromatic flavour.
- ✓ Nutraceutical properties: high content of vitamin C (60% higher than Hayward on average).
- ✓ Storage shelf life: very good, up to seven months in the refrigerator.
